ABOUT ME

I am a dedicated developer with four years of experience, specializing in personal projects, particularly those related to Discord. I graduated from Auckland University of Technology at the end of 2023, pursuing a double major in Software Development & Networks and Security in Computer and Information Science. My work history includes a lifeguard role I began during high school and continued until recently and a nighttime staff at Countdown. Additionally, I've taken on several casual roles, stepping in when staffing was short or opportunities presented themselves spontaneously. These experiences have taught me valuable customer service, teamwork, communication, and adaptability skills. As for my future aspirations, I aim to deepen my proficiency in coding and networks. While Java and Python are my primary languages, I'm eager to enhance my expertise in them and explore others, like C++.

EXPERIENCE

Lifeguard

Mt Albert Aquatic Centre

10/2019 - 05/2023 Mount Albert

- Ensured strong safety measures, preventing the need for water rescues during my time.
- Consistently maintained a safe swimming area for all guests.
- Quickly and effectively handled emergencies, ensuring everyone's safety.
- Regularly checked and kept the facility safe for visitors.
- Took care of end-of-day cleaning, keeping the facility neat and tidy.
- Provided helpful and friendly service, responding to visitors' needs and questions.

Lifeguard

Waitakere Water Polo

06/2020 - 09/2020 Henderson

- Assisted my water polo club with lifeguard duties.
- Worked at West Wave Aquatic Center due to a shortage of lifeguards.

Flippa Ball Coach

Point Chevalier School

11/2020 - 12/2020 Point Chevalier

- Coached a primary school water polo team.
- Brought experience from playing water polo up until 2020.
- The ages of the children ranged from 8 to 11.

Night fill Long Life Assistant

Countdown

11/2022 - 06/2023 Point Chevalier

- Regularly worked night shifts, contributing to the store's 24/7 operation.
- Handled heavy pallets and efficiently stocked shelves, ensuring product availability.
- Diligently prepared the store for its 7 am opening, ensuring a smooth start to the day.
- Occasionally supported the team during daytime shifts as needed.
- Worked reliably every Friday and Saturday night, collaborating effectively with a team of 4 to 5 members.

EDUCATION

Bachelor of Computer and Information Sciences

Auckland University of Technology

2021 - 2023

- In Software Development & Networks and Security.

CERTIFICATION

CCNA Enterprise Networking, Security, and Automation

Cisco - Oct, 2023

CCNA Switching, Routing, and Wireless Essentials

Cisco - Nov, 2022

CCNA Introduction to Networks

Cisco - Nov, 2021

PROJECTS

Chat Bot Platform

📅 02/2023 - 11/2023

🔗 <https://www.countiesmanukau.health.nz/>

- Engaged in a comprehensive project to design and implement a chatbot, as a key part of my degree's coursework, in collaboration with Counties Manukau.
- We used Bot Framework Composer to create the bot since it meets the requirements of running in Microsoft Teams. There wasn't much coding involved in creating this chatbot; it was more of a digital services project than a software development or networks project, which was unfortunate, but we still got the project done.

RamenNFT

📅 12/2021 - 02/2022

Social Media

- Oversaw and curated content for the company's Twitter and Instagram pages, focusing on exploring WEB3 technologies and the digital art landscape.
- RamenNFT was a project my friend from university, and I wanted to do. We started to get on the NFT craze, but we didn't get far into completing it because we didn't particularly like NFTs, so the project lost momentum.

iFridge

📅 07/2022 - 11/2022

🔗 <https://github.com/TheIFridge>

Uni Project- Back End Developer

- Spearheaded the development of backend solutions and executed comprehensive web scraping for top supermarkets, significantly enhancing data collection and analysis capabilities.

My GitHub Projects

📅 Present

🔗 <https://github.com/wobkobi>

- Currently maintaining a compact yet impactful collection of projects on GitHub. Actively planning to expand this repository with diverse and innovative future projects.
- My current projects are: reactionBot, a discord bot made for personal use in Python, which I'm moving over to typescript. And my website.

SKILLS

Adaptability	Attentive Listening		C Programming	Communication Skills		CSS	Customer Service
Flexible Attitude	Git	Gmail	HTML	Information Technology Services		Java Programming	Linux
Microsoft Excel	Microsoft Office 365		Microsoft Windows Server		Microsoft Word	Multitasking	
Next.JS	OneDrive	PHP Programming		Powershell Scripting	Proactive Attitude		Problem Solving
Python Programming		React.JS	Resilience	SQL	Task management	Team Work	Troubleshooting
TypeScript Programming		Virtualisation
